PROFESSIONAL SUMMARY

Full-stack software engineer with strong proficiency in JavaScript and TypeScript, specializing in Node.js, React.js, and scalable web application development. Experienced in designing and implementing RESTful APIs, data models, and secure authentication systems, with hands-on exposure to cloud deployment, performance optimization, and cross-functional collaboration in production environments.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, C, C++, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO

Databases: MongoDB (NoSQL), PostgreSQL (SQL), Supabase

Cloud & DevOps: AWS, Azure, CI/CD fundamentals, Linux (basic)

Tools & Practices: Git, GitHub, Swagger (OpenAPI), Agile, Documentation Standards

EXPERIENCE

Junior Associate Engineer — Celebal Technologies, Jaipur **Jul 2023 – Oct 2023**

- Developed, tested, and maintained end-to-end web application backends using Node.js and Express.
- Designed RESTful APIs and data models with strong validation, error handling, and security best practices.
- Collaborated with frontend, product, and DevOps teams to deploy and monitor applications on Microsoft Azure.
- Improved application performance and reliability by debugging production issues and optimizing API response paths.
- Maintained code quality and documentation standards using Git and GitHub.

PROJECTS

Second Brain – AI-Powered Personal Knowledge Management Platform **2026**

Developed an end-to-end AI-powered web application enabling users to capture, organize, search, and retrieve notes, links, documents, and images. Designed secure REST APIs with JWT-based authentication and strict user-level data isolation. Implemented semantic search using vector embeddings and integrated AI-assisted question answering grounded strictly in user-owned data.

Technologies: Node.js, Express.js, MongoDB, JWT, Vector Embeddings, Hugging Face, AWS, React.js, Tailwind CSS, Groq API

Smart Appointment & Real-Time Queue Management System **2026**

Built a scalable multi-tenant web application backend for appointment scheduling and real-time queue management. Designed APIs, data models, and real-time communication using Socket.IO, ensuring performance, concurrency safety, and role-based access control.

Technologies: Node.js, Express.js, MongoDB, Socket.IO, JWT, Swagger (OpenAPI)

BarterHub – Skill Exchange Platform **2025**

Developed backend services for a full-stack web platform supporting authentication, real-time messaging, and persistent data storage.

Technologies: Next.js, Supabase, PostgreSQL

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology — Arya College of Engineering & IT, Jaipur (CGPA: 8.4/10) **2019 – 2023**
